

Morpheus Dashboard V2 – Dev-Ready Checklist

Phase 1 – Hero Signal Card

- Build dominant above-the-fold card
- Apply locked copy and confidence language
- Add empty-state reassurance and timestamps

Phase 2 – KPI Strip

- Implement 4-KPI horizontal strip
- Apply standard vs investor-mode labels
- Attach tooltips with locked conviction definition

Phase 3 – Recent Signals (Card-First)

- Create card-based signal feed
- Limit visible cards (3–5)
- Add empty-state and evaluation timestamps

Phase 4 – Watchlist Coverage UX

- Reframe limits as coverage and capacity
- Add calm full-capacity messaging
- Implement Add Coverage Units language

Phase 5 – Global Micro-Copy

- Replace loading/error language
- Standardize tooltips and CTAs
- Remove destructive or salesy terms

Phase 6 – Investor Demo Mode

- Enable ?demo=true toggle
- Apply elevated labels and system framing
- Hide configuration and billing UI

Phase 7 – Visual Refinement & QA

- Enforce spacing and typography rules
- Apply color discipline
- Run 5-second, screenshot, and silence tests
